EB Icon Picker

Content Blocks · https://essential-blocks.com/docs/eb-icon-picker/

The **EB Icon Picker** aids you in enhancing the pages of your Gutenberg website with icons that connect to your audience, clearly communicate your messages, and increase the value of your brand.

Follow the step-by-step guide to use the EB Icon Picker block of **Essential Blocks** and get access to a vast library of icons of different categories and styles.

How To Use The EB Icon Picker Block?

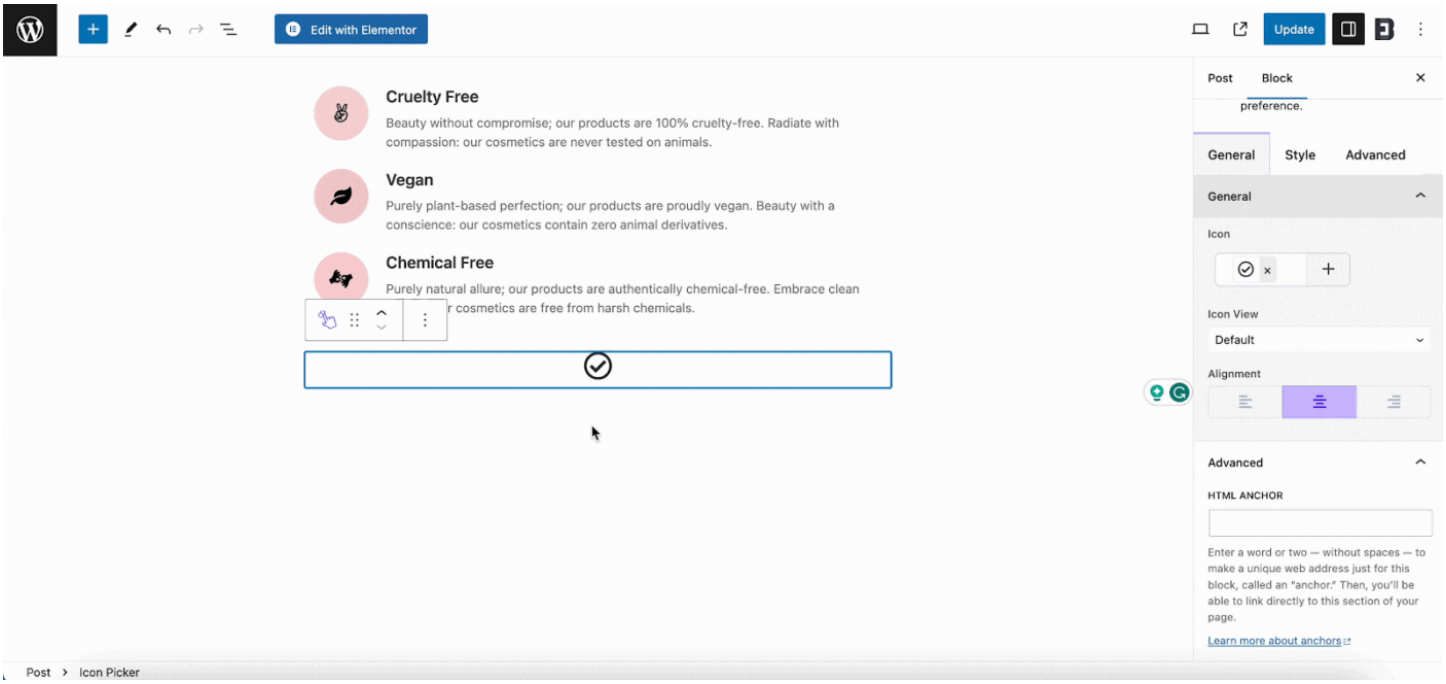

You can use the **EB Icon Picker** block as a solo block and style it or you can also use it in Headings, Pricing Tables, Feature Lists, Containers, and more. Learn to add icons with the EB Icon Picker by following the easy steps below.

Step 1: Add The EB Icon Picker Block

First, open a page in Gutenberg. Click on the **‘+’** icon and search ‘**EB Icon Picker’** in the search bar. Just click on the block and it will be added to your page.

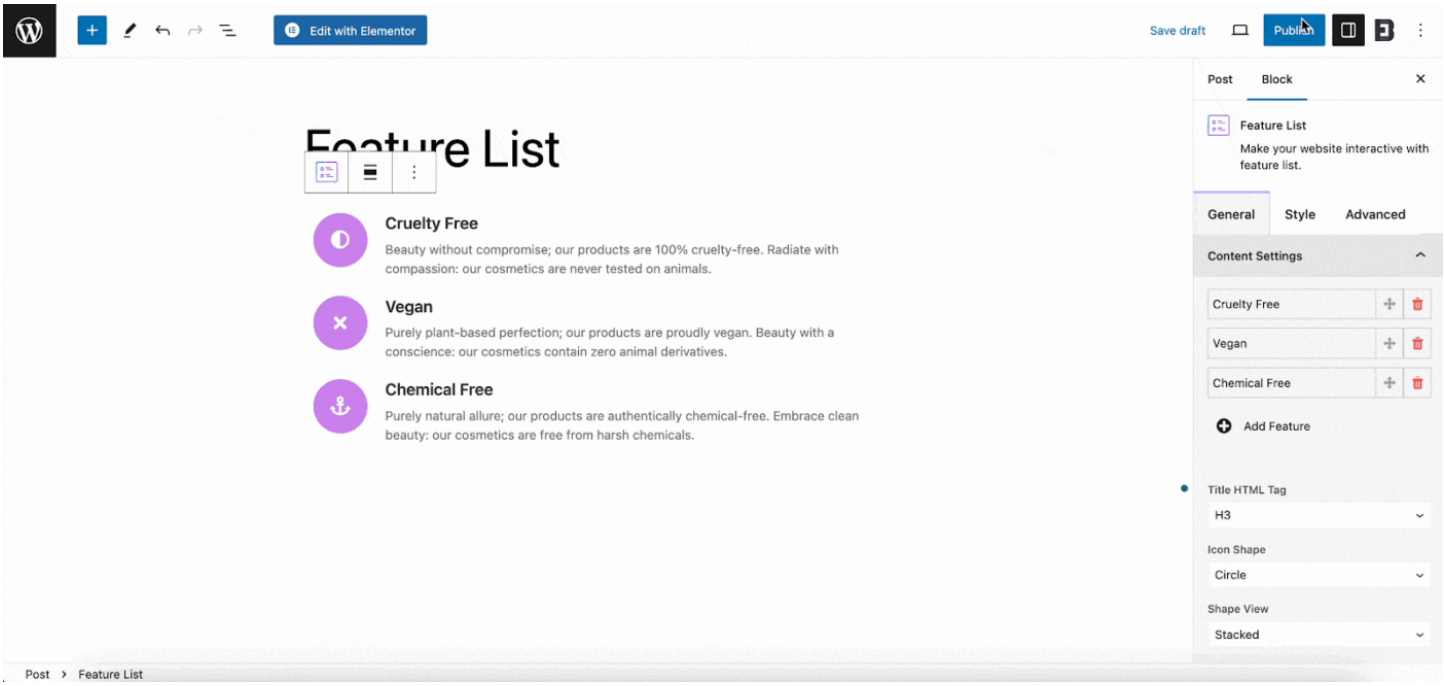

From the **‘Icon View’** option, choose the view style you prefer. Also, select your preferred ‘Icon Shape’ and change the **‘Alignment’** of the icon as needed.

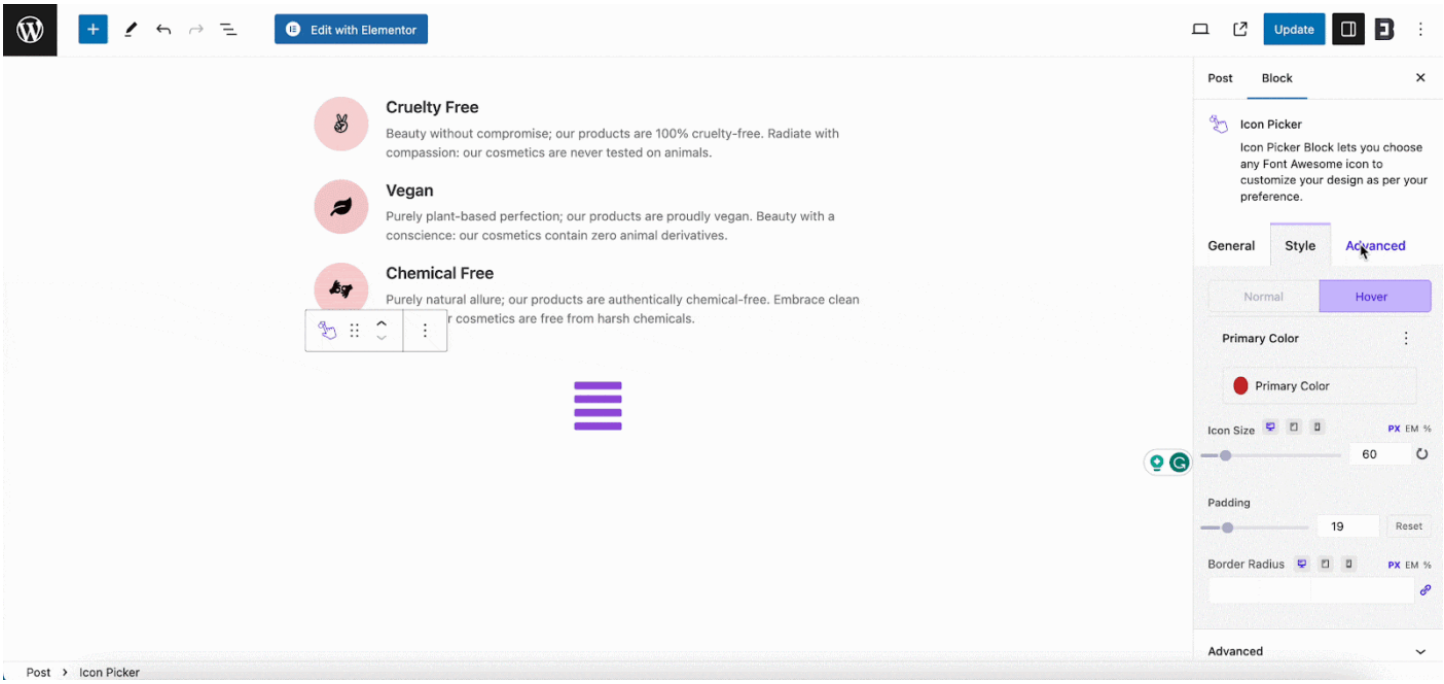

Step 2: Select The Icon Your Prefer

Now, click on the block and go to the **‘General’** tab. From the **‘Content Settings’** section, click on the feature list where you want to use an icon. From the **‘Select Icon’** option, choose the icon that matches the feature. Similarly, choose the icon you prefer for other feature lists.

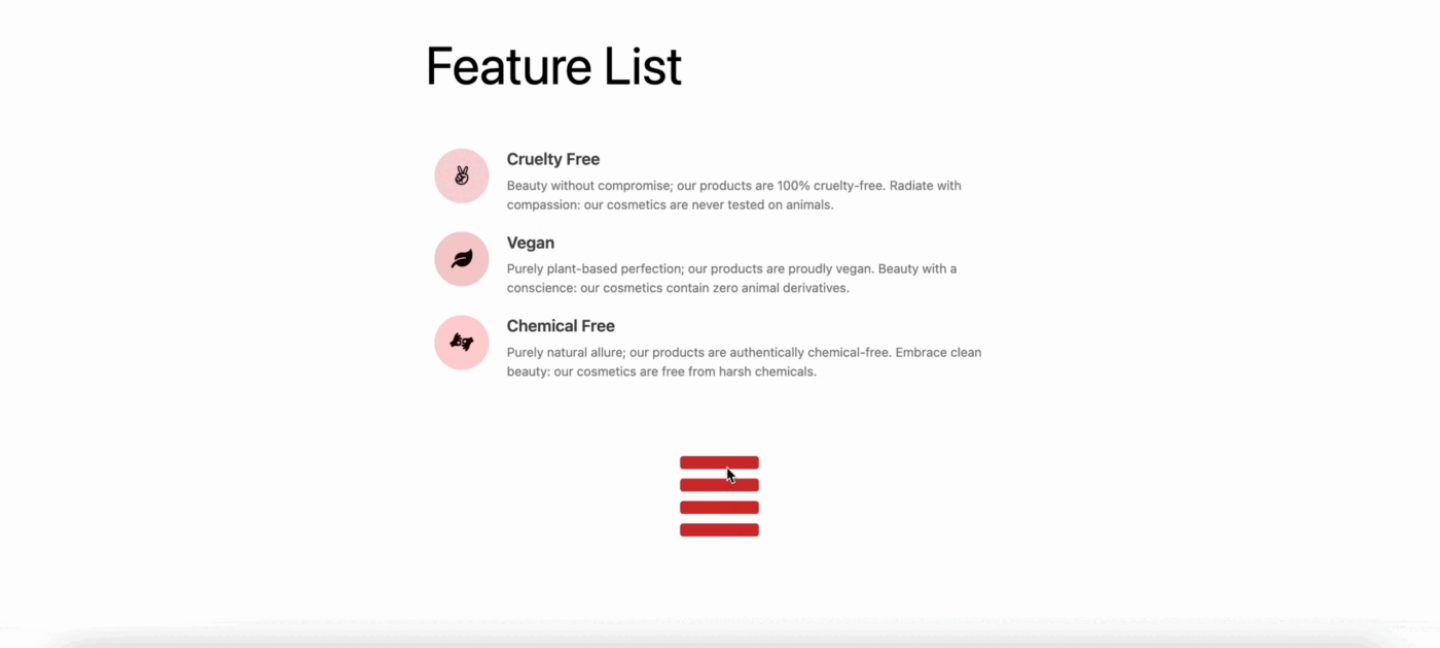

Step 3: Configure Advanced Settings

For advanced customization and styling options, move to the **‘Advanced Tab’**. You will find multiple advanced options to style and customize the Icon and give it the appearance you prefer.

Simply click on the '**Publish**' button once you are done. Thus, you can use the EB Icon Picker as a solo block in Gutenberg and customize it just the way you like. Let's have a look.

You can use this block in the **EB Multicolumn Pricing** table as well. Getting stuck? Feel free to contact our **support team** for further assistance.
