EB Row

Content Blocks · https://essential-blocks.com/docs/eb-row/

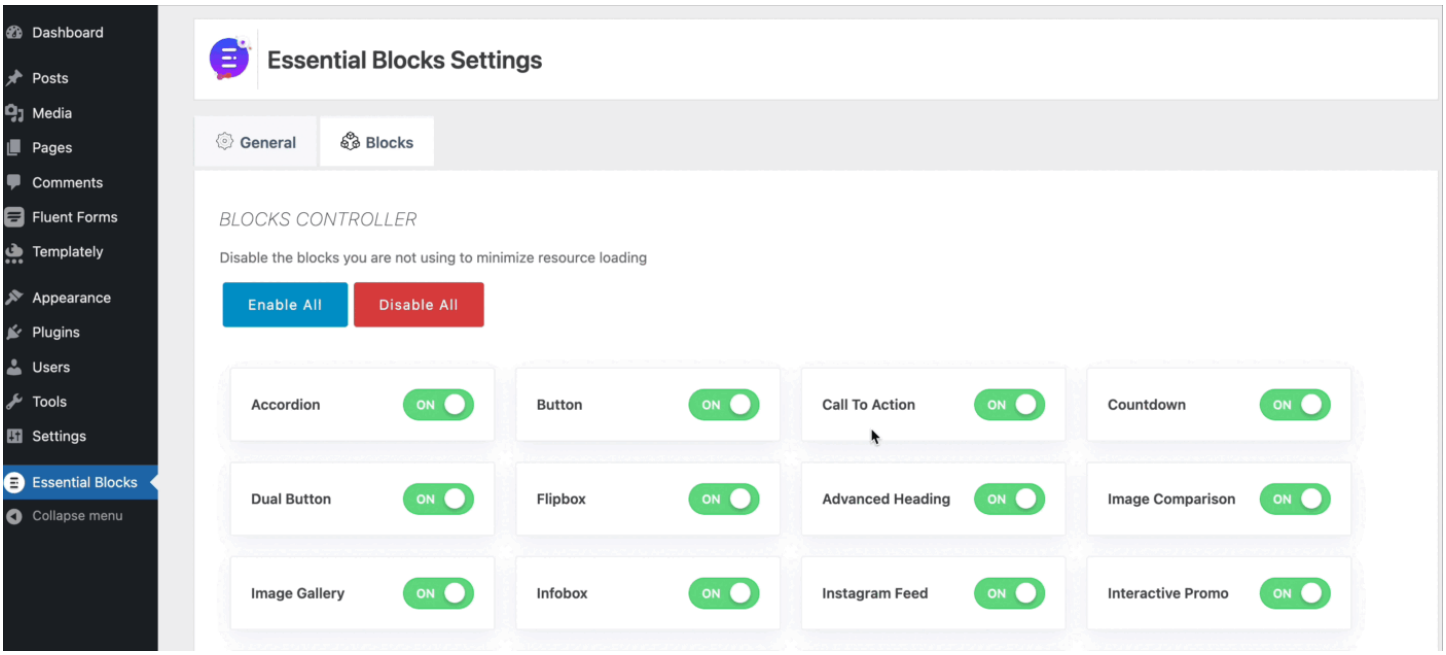

With **EB Row** block, you can easily design content on your website with versatile layouts, patterns, etc. This exclusive block will also help you to design in Gutenberg with utmost flexibility. **Essential Blocks** offers a wide range of customization options, flexible styling, and many more.

Follow this step-by-step guide to designing WordPress website content using the **EB Row block** in Gutenberg.

How To Activate EB Row Block?

First, **install and activate the Essential Blocks** for Gutenberg plugin in your WordPress dashboard. Essential blocks come with modular control which gives you the freedom to enable only using blocks.

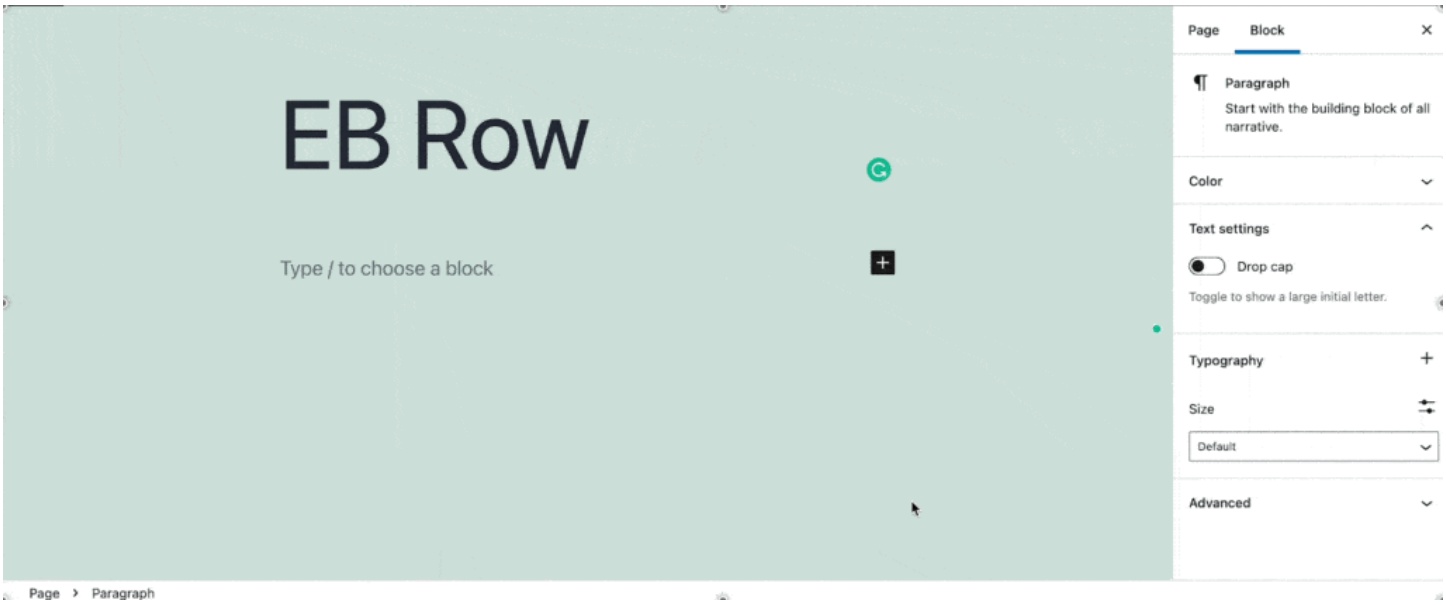

To activate EB Row, navigate to **Essential Blocks → Blocks**. Then, toggle to enable this **'Row'** block. After that, click on the **'Save'** button.

How To Configure EB Row In Gutenberg?

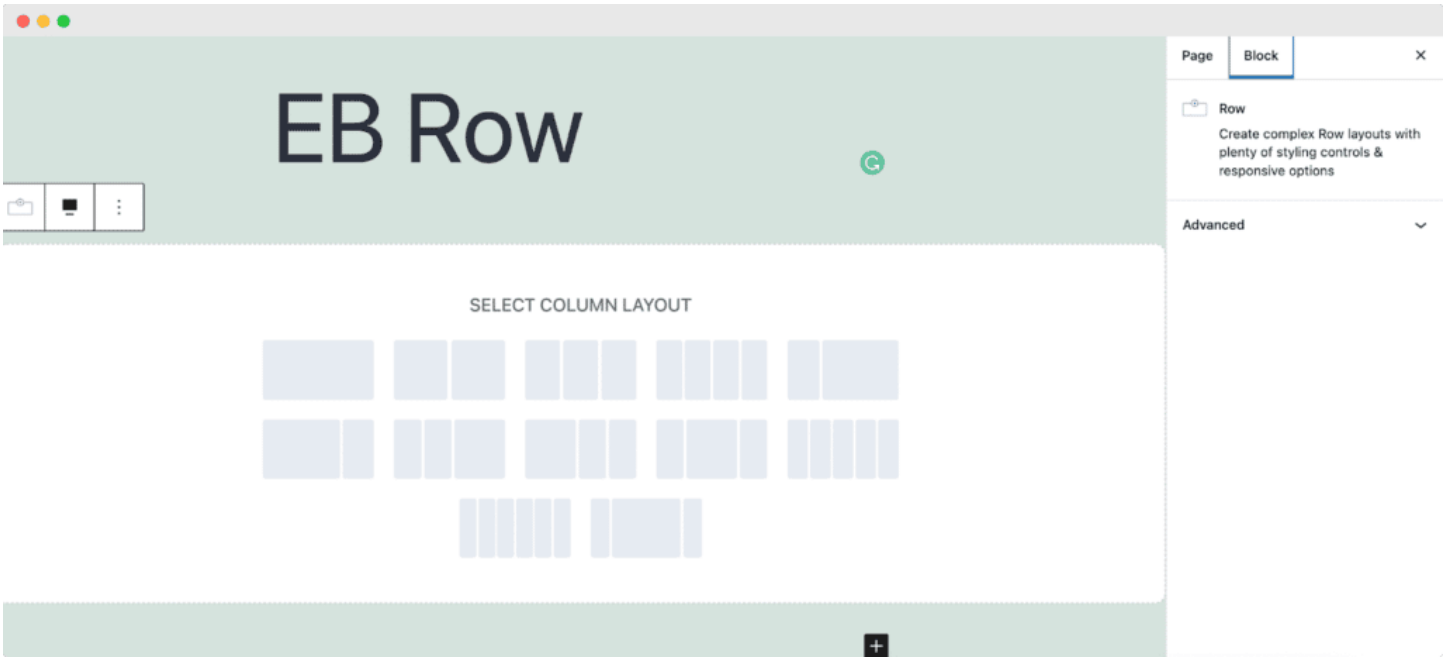

Here, open a new page where you want to add a new row. Then click on the **‘+’** icon and search for Row.

Afterward, click on the EB ‘**Row**’ block and that will be added instantly to your webpage.

In EB Row block, you will get **12 preset column layouts** (1, ½ ½, ⅓ ⅓ ⅓, etc). All the column widths are flexible, so you can customize them as you need. Moreover, you can design the **row section in full width** or keep it without alignment.

Pick a column layout that suits perfectly with your entire website design in Gutenberg.

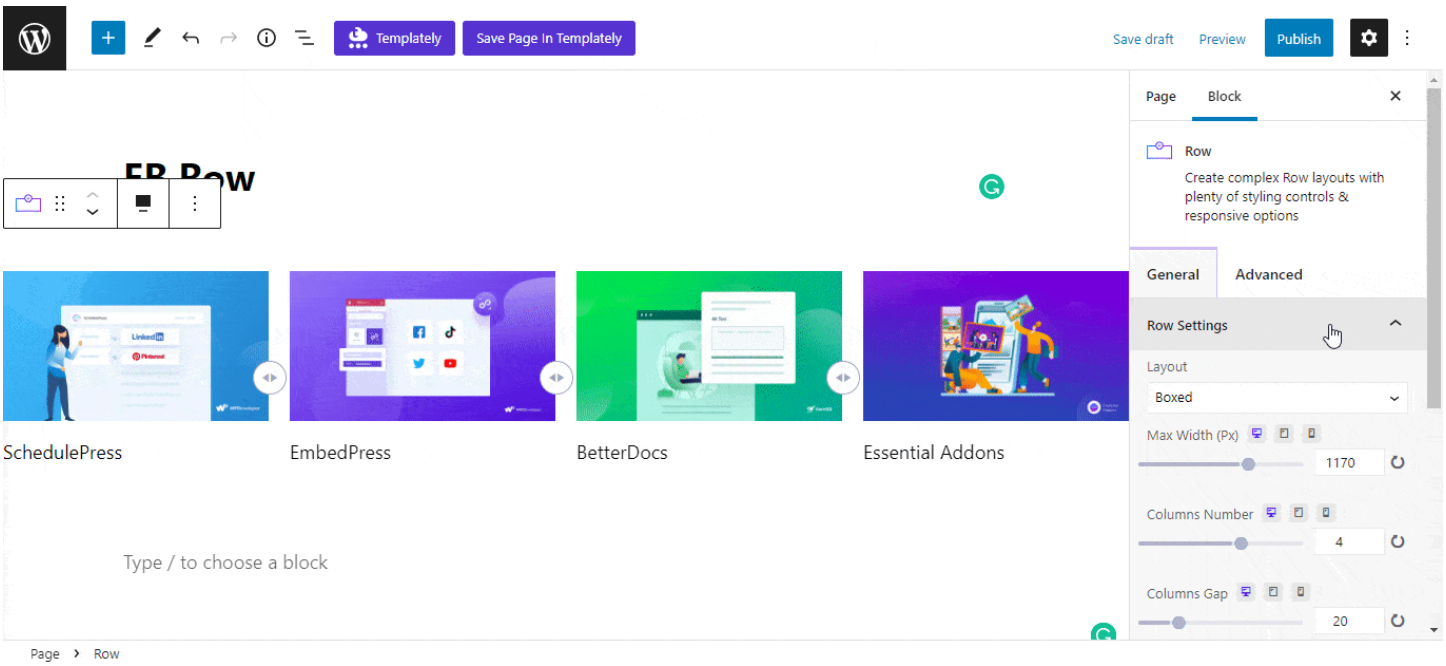

Next, customize content under the EB Row block. Click on the **‘+’** icon on a column placeholder and add blocks. Then add content one by one on each placeholder.

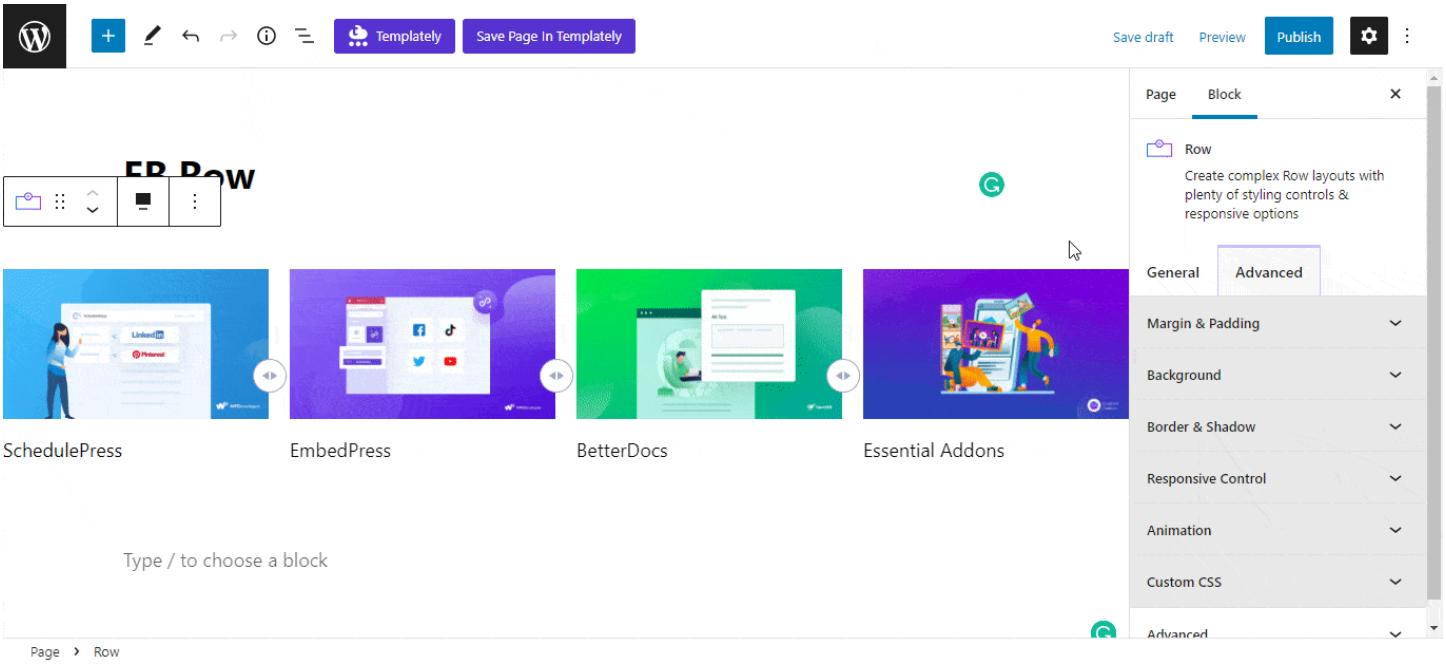

General

From **General → Row Settings**, you can customize content block placing. You can keep the Layout boxed or full-width. You can adjust the **Max Width** & **Column Gap** by changing the value. Similarly, you can customize the **Height**, **Column Vertical Align** to the top, middle, or bottom, and change the Overflow option to visible or hidden, etc.

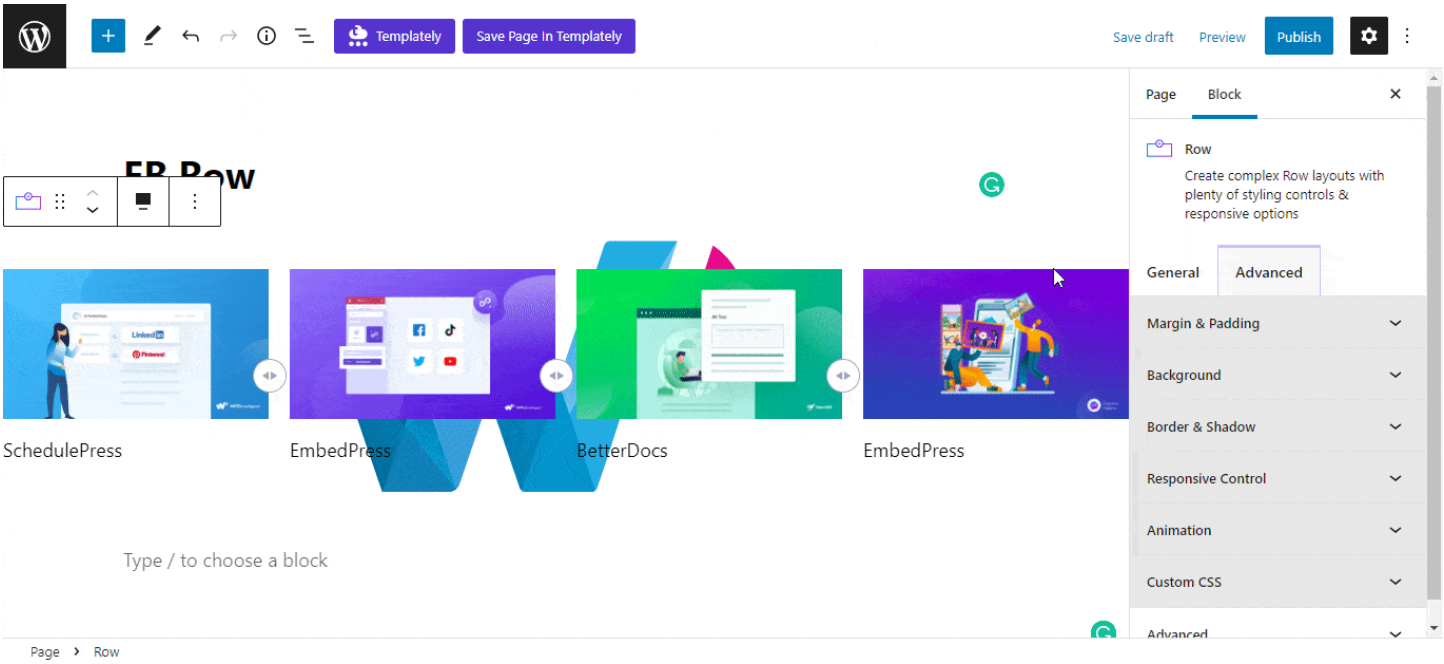

Advanced

From the '**Advanced**' tab, you can choose to make the EB Row block look more interactive and pleasing. Here, you can change the **Row Margin**, **Padding**, **color and image**, **Border & Shadow**, etc. All advanced block design customization options are available there.

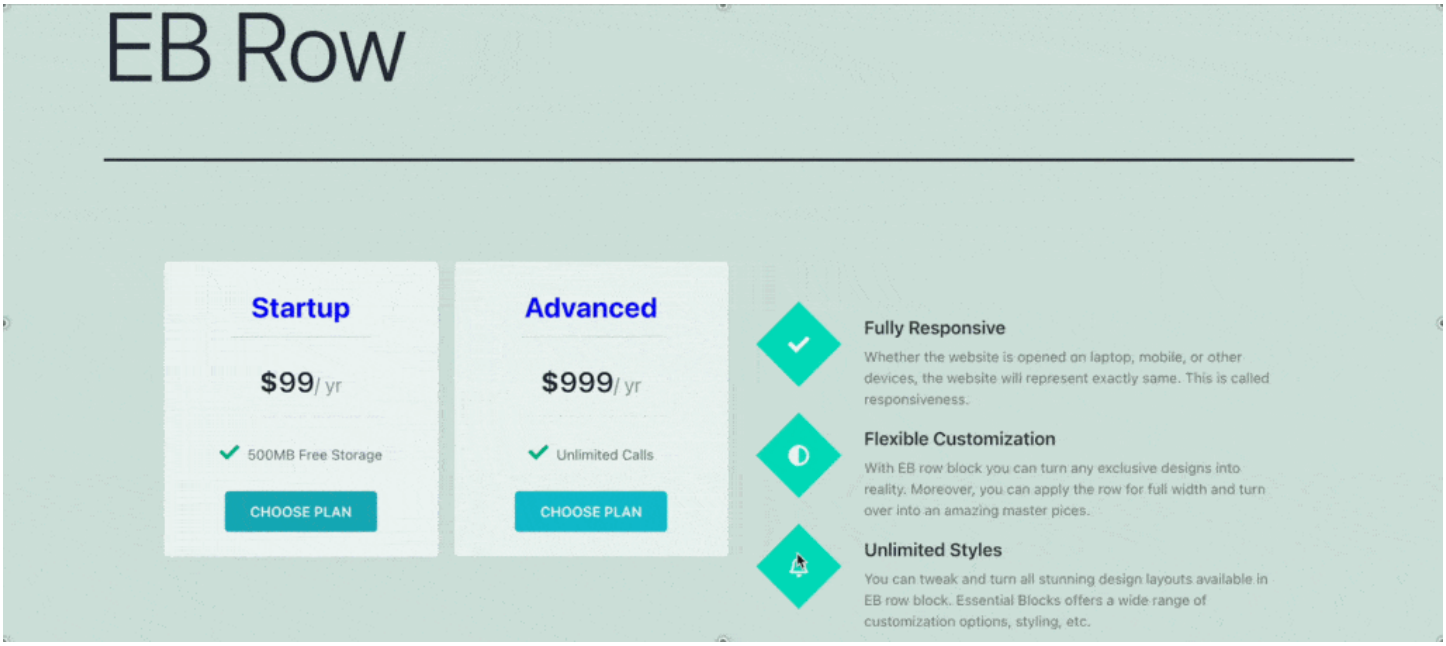

From the Background section, you can apply **Overlay** on the EB Row block. You can apply Overlay for the **normal mode** or **hover mode**. For color customization, you can use a **background image**, **solid color**, **gradient**, etc. You can also customize the Background Transition as well.

Final Outcome

After making all the changes, click on the **‘Publish’** button to make your page live. Check out how the Row block will appear on your website.

This is how to design an **EB Row** block in Gutenberg easily.
