# EB WPForms

Form Styler Blocks · https://essential-blocks.com/docs/eb-wpforms/

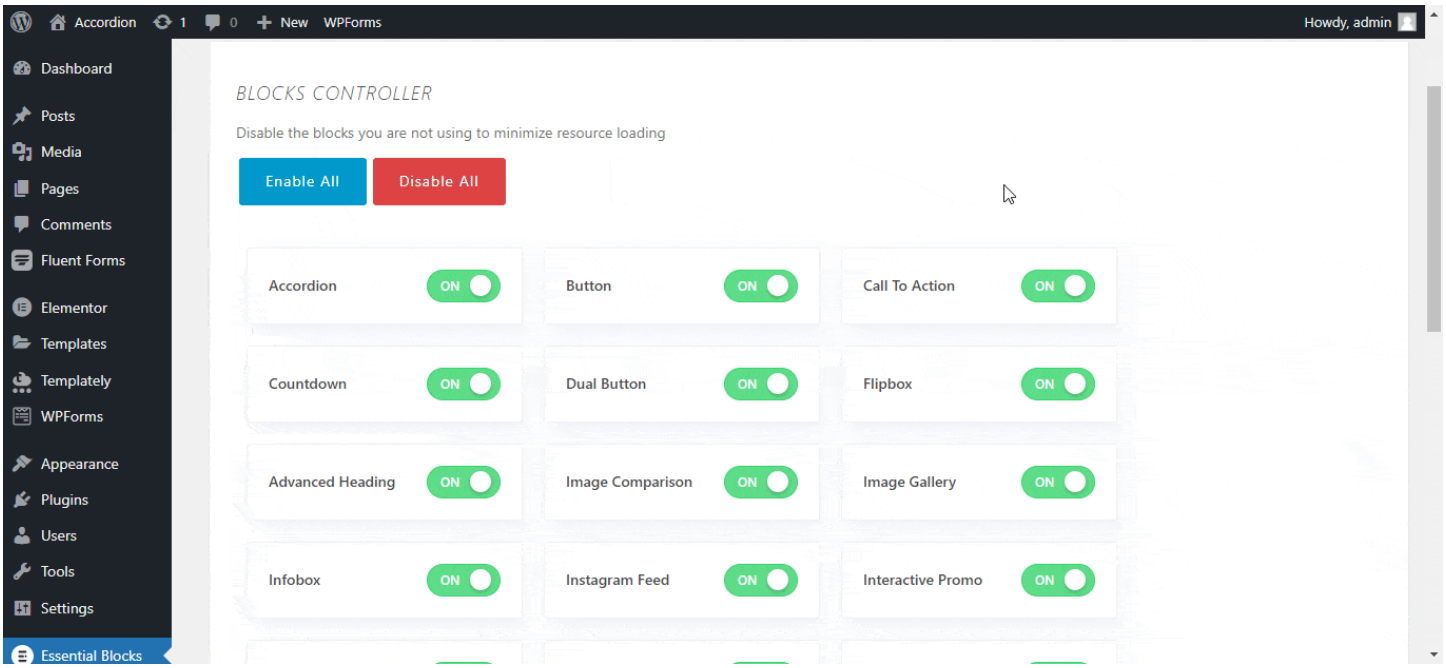

Seamlessly create a contact form, subscription form, and more in Gutenberg with **EB WPForms block**. With this block, you can easily style and design any kind of submission form without any coding.

Follow this simple step-by-step guide to use WPForms with **Essential Blocks for Gutenberg**.

## How To Activate EB WPForms Block?

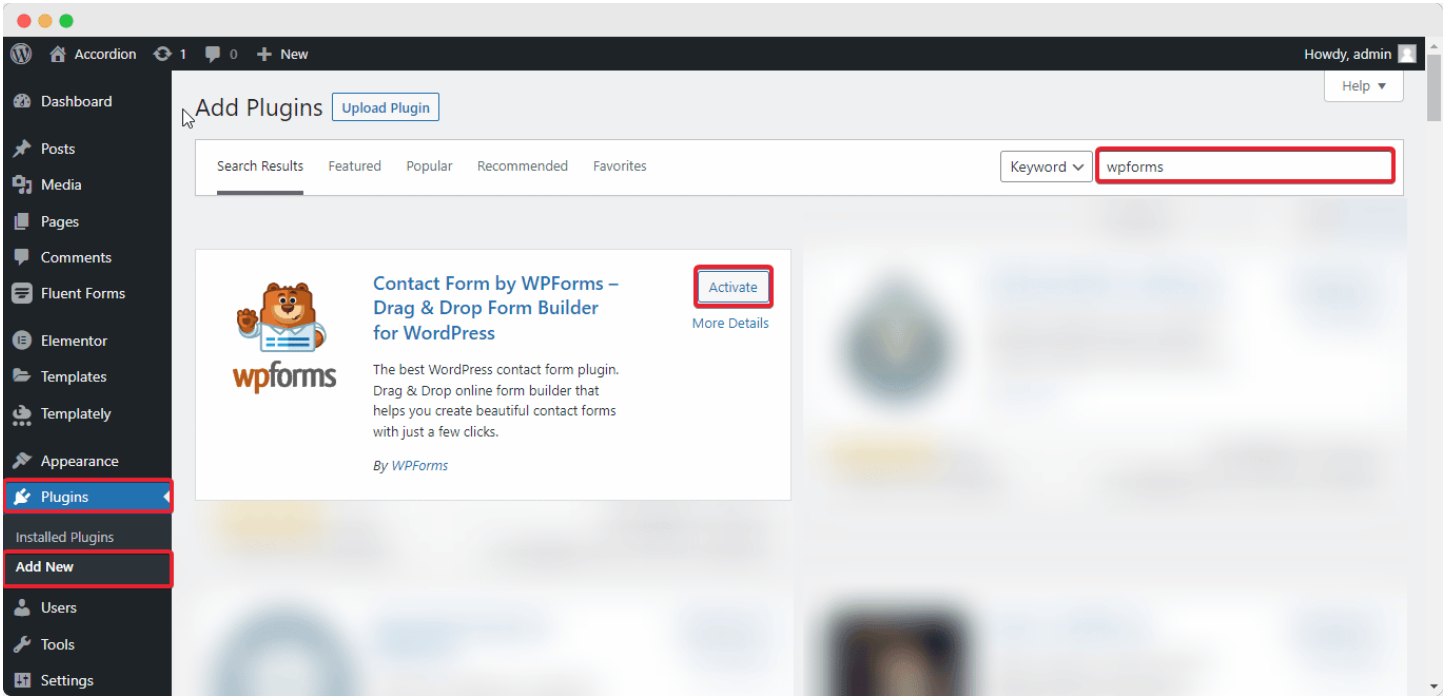

First, **install and activate the Essential Blocks** for Gutenberg plugin into your WordPress dashboard. Essential blocks come with modular control which gives you the freedom to enable only using blocks.

To activate EB WPForms, navigate to **Essential Blocks → Blocks**. Then, toggle to enable this **'WPForms'** block. After that, click on the **'Save'** button.

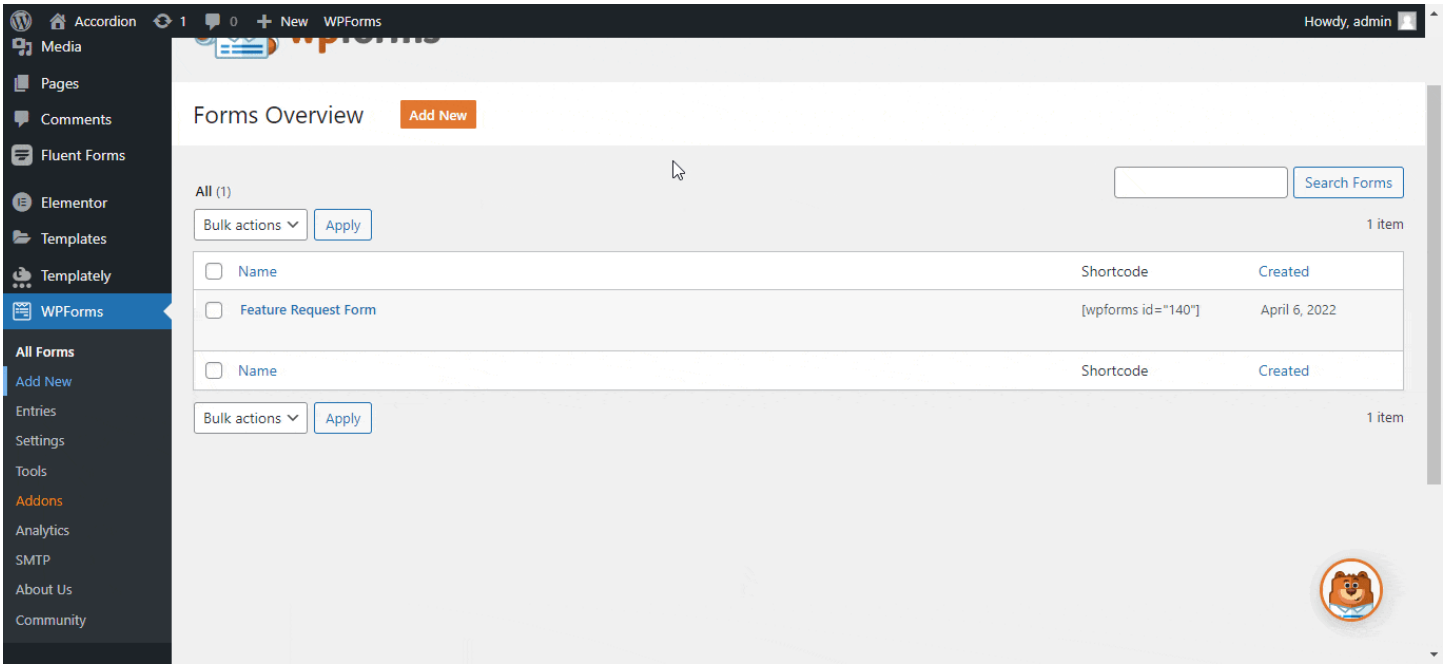

# How To  Install & Activate WPForms Plugin?

In order to work with WPForms, you need to activate and install **WPForms** from the dashboard. Navigate to **Plugins→ Add New,** from the search box type '**WPForms**' then hit enter. After that install and activate the form plugin.

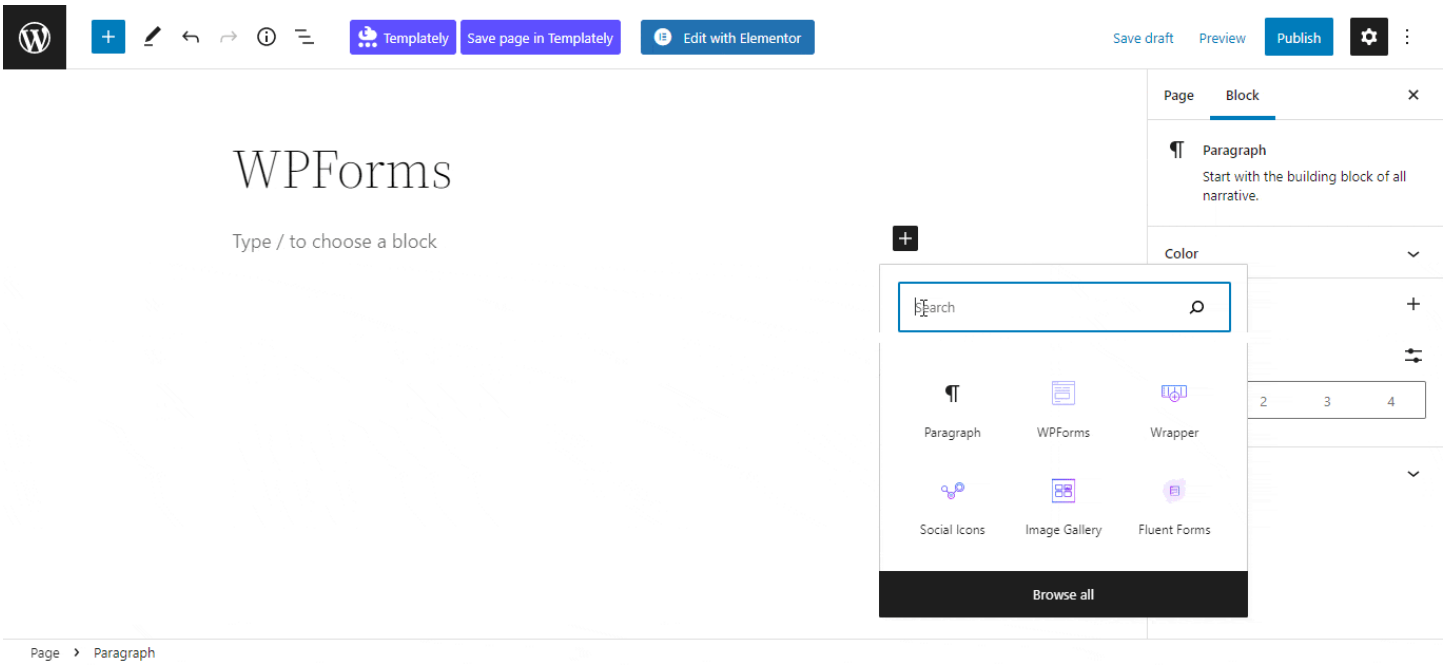

# How To Add New Forms Using WPForms?

After you have successfully installed 'WPForms', then you can pick any type of form you want. Navigate to **WPForms→ Add New** and pick any template you prefer and **Save** the form.

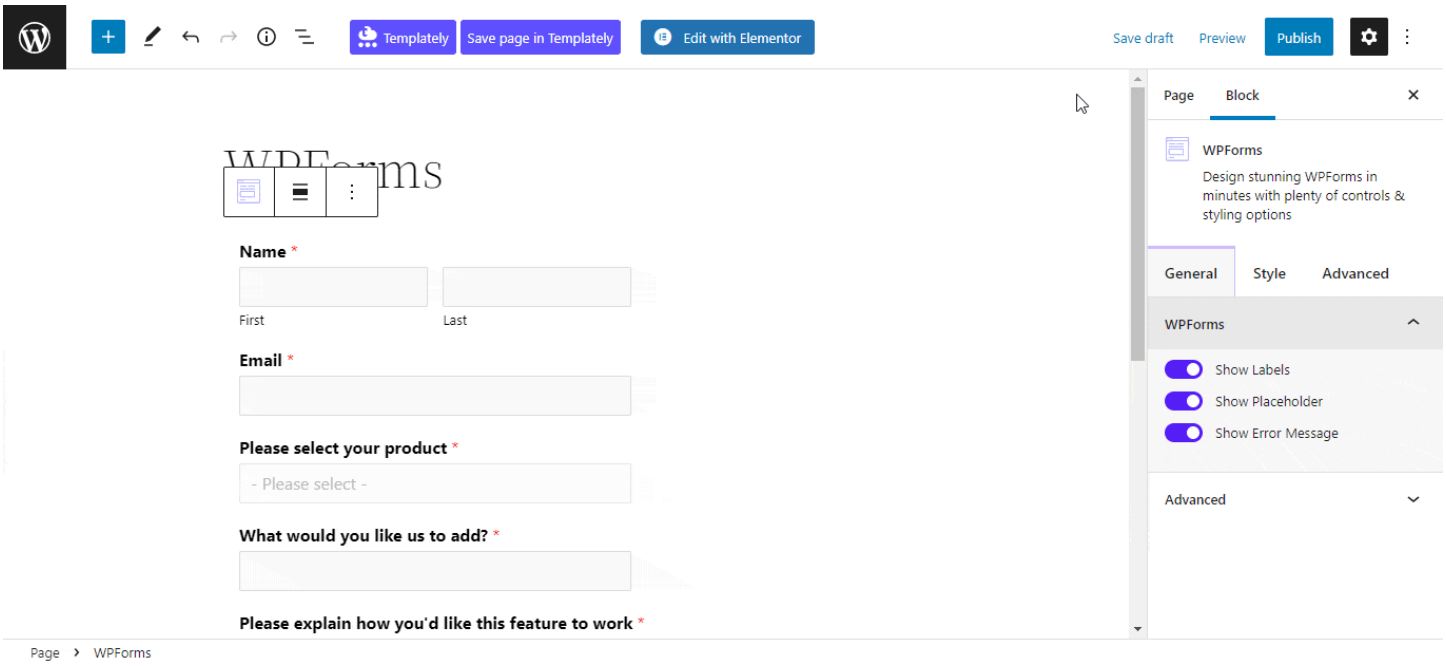

## How To Configure EB WPForms Block In Gutenberg?

Now open a new page or existing page on Gutenberg. Press the **'+'** icon, type **WPForms**, and just click on the block. It will appear on your main editing page. Choose the form you have saved on the WPForms dashboard.

## General

To configure the general features of the form, navigate to **Block→General**. From there you can toggle between **Show Label**, **Show Placeholder** & **Show Error Message** options.

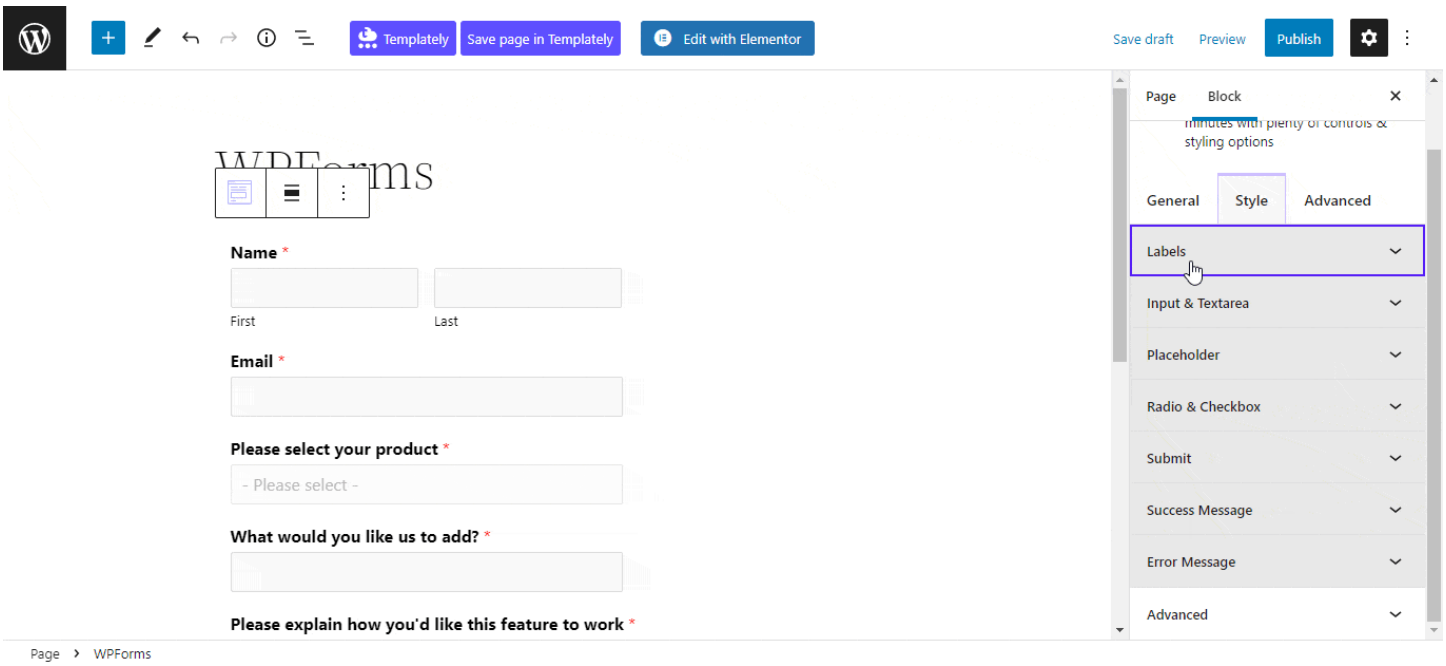

## Style

To change the outlook of your form, you can apply various customization from the style menu. For that, navigate to **Blocks→Style,** from there you can change the color and typography from the **Label** option.

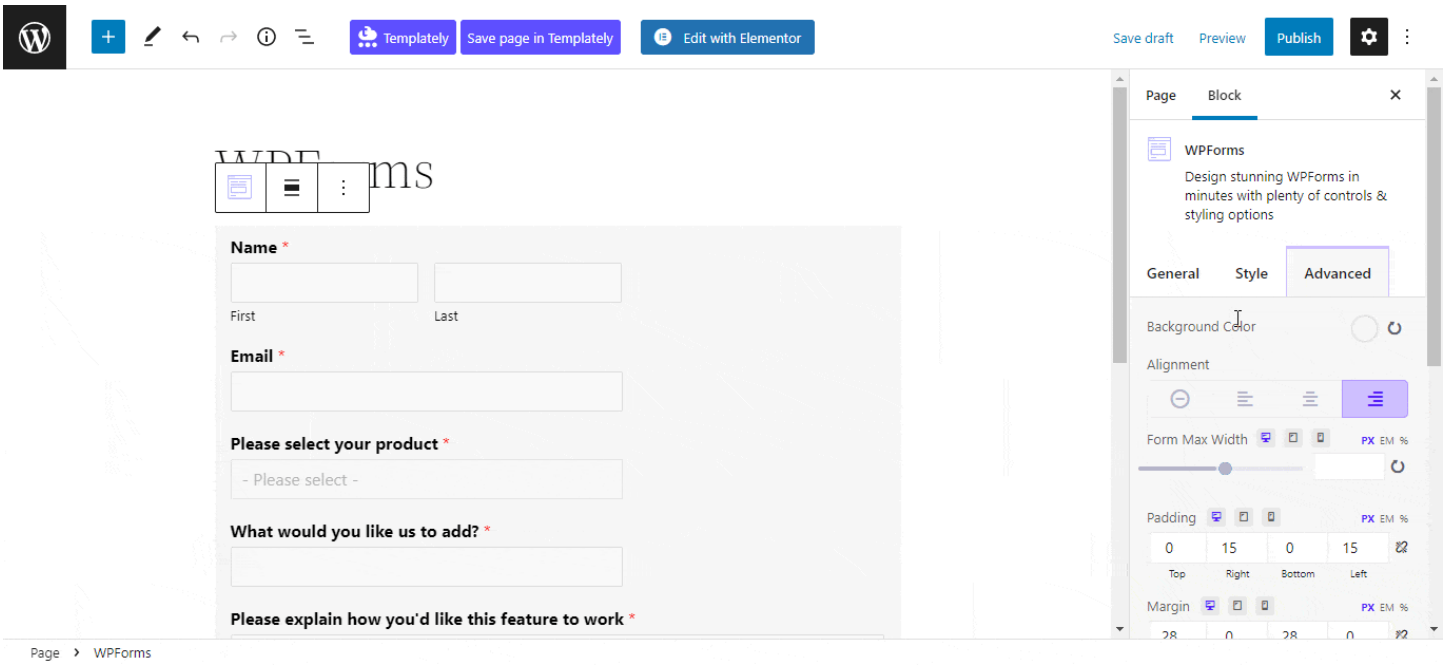

From the **Input & Text** area option, you can change background color, and typography as well as switch between the **Normal** & **Focus** option.

Choose any border style from **Border & Shadow** option. Configure your alignment and width from under **Submit** option. Finally, customize your **Error Message** or **Success Message** as per your preference.

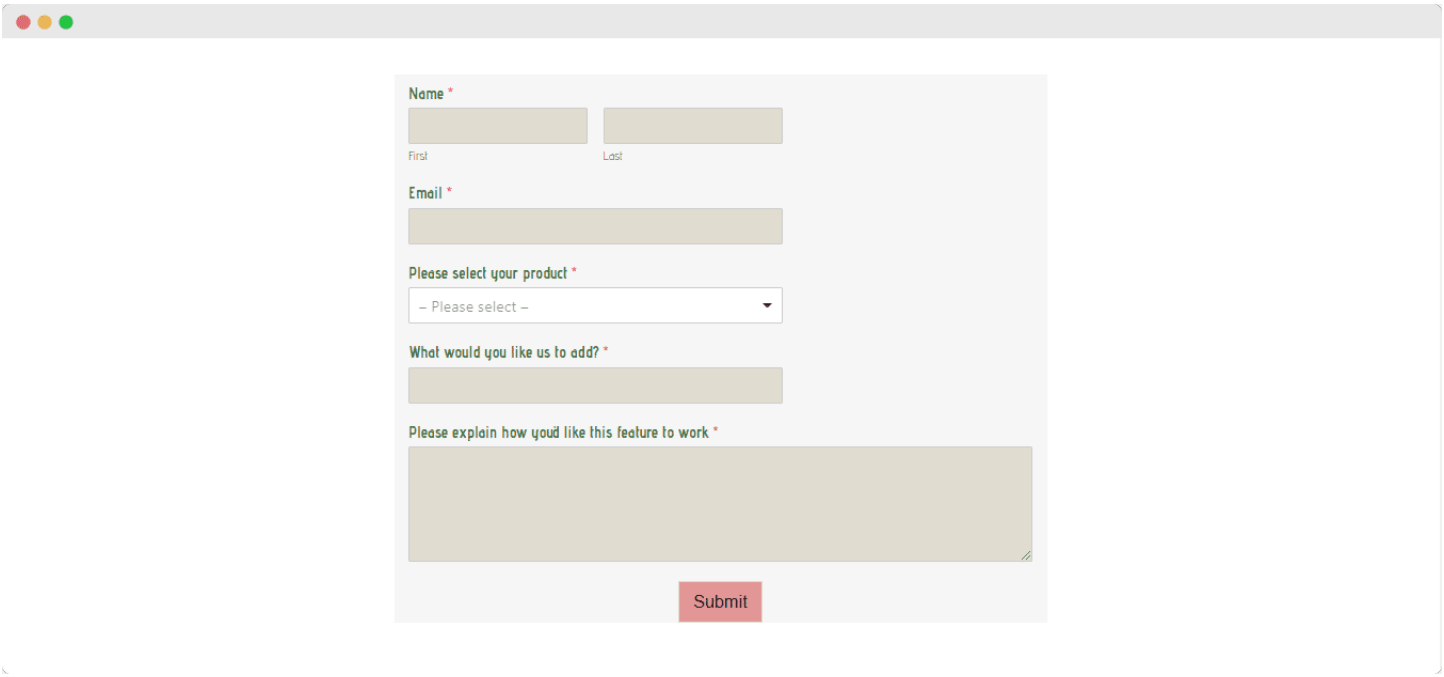

## Advanced

From the **Advanced** tab, you can change your form background color, alignment, padding & margin. Under **Border & Shadow** option customize Border Style, Border Radius & Box Shadow.

## Final Outcome

By following these basic steps, you can easily style and configure your WPForms in Gutenberg using the EB WPForms block without coding.
