How To Generate Openverse API With Essential Blocks?

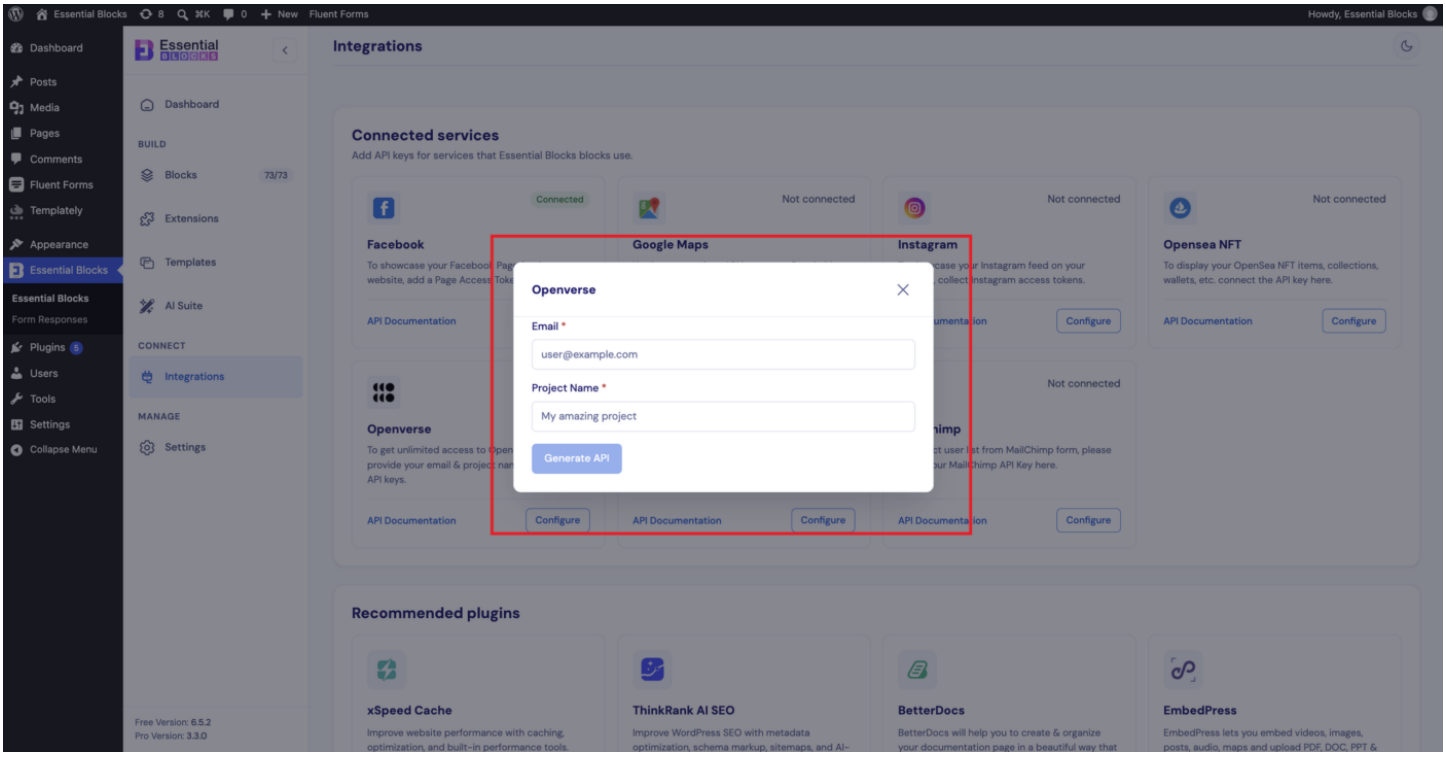

Configurations · https://essential-blocks.com/docs/generate-openverse-api/

You can utilize free images, royalty-free images, CC-licensed images, and so on your WordPress site with a single click with the **EB Openverse block**. But first, you need to integrate it into **Essential Blocks** from your WordPress dashboard. Without the Openverse API key, you will not get **unlimited access** to use royalty-free images. Follow the instructions for more.

Now go to your WordPress dashboard. From there navigate to **Essential Blocks → Settings**.

Now simply add your email and project name. After that click on the **Generate API** to successfully generate your API key. Use this key on the block while working with Essential Blocks.

This is how you can configure Openverse with Essential Blocks easily.
